THINK AETNA FOR ALL YOUR FABRICATION NEEDS!

Aetna can offer you custom fabricated parts usually within two weeks of the order. Carloads, truckloads or a few hundred pieces are all handled with the same experience that has made Aetna a dependable supplier to many Midwest manufacturers since 1937.

Aetna can cut your wood... You can cut your:

- costs
 - time
 - inventory
 - waste
 - operations
- Aetna has the equipment it takes, the inventory available and the capabilities you need.
 - Receive ready-to-assemble precision parts just in time to meet your requirements

In a changing competitive market, the best advantage is to have valuable options. Aetna's depth of inventory and resources gives you the options you need to succeed.

TIRED OF MESSY GLUE OPERATIONS?

LOOK TO AETNA FOR YOUR LAMINATING NEEDS!

Aetna can:

- **lower your finished panel costs**
- **free up your skilled employees**
- **free up your shop from messy glue operations**

Aetna offers a quick turn around with professional results. We cold press panels using environmentally friendly, water-based PVA glue resulting in a superior bond. We offer all the popular faces & cores to get you what you want when you want it!

MDF PANELS

Arauco is the largest forestry enterprise in South America and one of the largest in the world in terms of plantation size, kraft pulp, sawn timber and panel production.

Arauco's timberlands total of more than 1,100,000 há. and consist of plantations, native forestlands and protected areas. In Chile, the company's holding include approximately 600,000 há. of managed Radiata Pine plantations.

The company produces medium density fiberboard (MDF) through its Trupan division. With the recent construction of two new MDF plants, Trupan's planned annual capacity will increase from 150,000 m³ per year to 650,000 m³.

These two new continuous press plants will allow Trupan to produce various densities of MDF (e.g. standard, light and ultralight) in a wide variety of thicknesses ranging from 1/8" to 2" and sizes.

Trupan MDF boards is produced from fresh, debarked Pine logs harvested from Arauco's own company managed plantations. Due to the excellent quality of our 100% softwood raw material, Trupan MDF is exceptionally easy to machine and has excellent edge profiling characteristics. Its smooth, uniform surface offers exceptional performance for both painting and laminating applications. It is ideal material for use in furniture, RV, and fixture industries.

TRUPAN STANDARD: Fiber Board with an average of 45lbs/ft³ (720 kgs/m³) of density, ideal for uses that require demanding physical-mechanical properties. Applications: Furniture, laminating, fixture, mouldings, doors and others.

TRUPAN LIGHT: Fiber Board with an average of 38lbs/ft³ (600 kgs/m³) of density, ideal for uses that require demanding physical-mechanical properties and less weight than standard MDF. Applications: Furniture, interior design, doors, fixture, RV, laminating, mouldings and others.

TRUPAN ULTRALIGHT: Fiber Board with an average of 32lbs/ft³ (500 kgs/m³) of density, ideal for uses where an extremely light weight material is requested. Applications: Furniture, mouldings, RV, suspended ceiling, indoor paneling, picture frames and others.

TRUPAN THIN MDF:

Fiber Board with an average of 50lbs/ft³ (800 kgs/m³) of density.

Ultralight MDF

Ultralight MDF is the lightweight MDF with the heavyweight advantages. It offers homogeneous edges, smooth surface and high dimensional stability. Plus, all the ease of finishing and machinability you expect from MDF.

- Produced from self-sustainable Radiata Pine by-products, using state-of-the-art technology that makes intelligent, effective and environmentally-sound use of forest and mill by-products.

Applications:

Furniture and furniture components, casing and decorative finishes. Mobile homes or boat interiors, displays, and exhibition booths.

Fastening:

Straight shank (parallel thread) screws; ring-shank nails fixed slightly slanted to the surface; grooved dowels, staples and glues are recommended. Fasteners should be at least 1" from corners.

We've Expanded Our Inventory!
