F R L

Fiberglass Reinforced Laminate

<i>What is FRL?</i>	A wall surfacing solution from Panolam Industries.
<i>Where can FRL be used?</i>	Wall applications in hospitals, schools, fast food restaurants, department stores and high density public areas such as airports or mass transit facilities.
<i>What are the benefits of FRL?</i>	<ul style="list-style-type: none">• Class A Fire Rated for flame spread and Development• High Impact Strength, conceived as a “wall you can walk on”• Durable and easy to clean surface• Solid, monolithic, with fiber re-reinforcement gives FRL unique qualities for ease of application for job-site workability
<i>So FRL can be applied directly onto a wall?</i>	Yes, FRL in the .088" thickness is designed for job-site applications. Call us for an installation guide.
<i>Is FRL available in different colors or patterns?</i>	FRL is available in all 320 Panolam & Pionite colors.
<i>Is FRL available with different surface textures?</i>	Yes, FRL is available in 4 textures; Suede, Ashwood, Soft leather and Crystal.
<i>How thick is FRL?</i>	FRL is available in .088" for wall applications and .048" for lamination onto a substrate like <u>Duraflake Fire-Rated particleboard</u> .
<i>What panel sizes are available in FRL?</i>	FRL panels are available in 3'x12', 4'x8', 4'x10', 4'x12', 5'x8', 5'x10' and 5'x12'.
<i>Can I use FRL for a Wainscoting application?</i>	FRL is perfect for wainscoting since it's available in a 3'x12' panel size and may be specified as “cross-grained”.
<i>How do I order FRL?</i>	Determine thickness, panels size and pattern name or number and CALL AETNA PLYWOOD!

QUALITY FACTORS FOR AETNA SLOT-WALL PANELS

Aetna Slot-Wall panels are manufactured using only first quality MDF (medium density fiberboard). Although industry standards require a minimum Internal Bond of 90 PSI, we use MDF with an average Internal Bond of 105 PSI.

To slot the panels, we use Diamond Tipped cutting tools and the panels are slotted on precision equipment. The result is Slot-Wall panels that have precise slot dimensions and all slots are properly located from panel to panel. This ensures that the slots on one panel will line up properly with an adjacent panel.

For most retail applications, standard Slot-Wall panels have proven to be strong enough for display of merchandise. The use of our PVC insert or Aluminum insert will increase the hanging strength. Our aluminum extrusions are .040" thick and conform to the shape of the slot resulting in greater hanging strength for the Slot-Wall panel.

Face materials available include: Real hardwood veneers, high pressure laminates, melamine and paint grade MDF. Using Wilsonart brand laminate for the faces allows a wide range of colors, patterns, woodgrains and finishes. The lead time is lessened due to prompt availability of the laminate.

Other standard specifications are as follows: Groove spacing is 3" on center. Customized spacing is available in other configurations. Panel size is 48x96. Virtually any special size is available on custom order. Panel thickness is 3/4". For divider walls and displays, 1-1/2" panels are grooved on both sides and available on custom order.

More than 30 years of experience in manufacturing Slot-Wall and millions of square feet in the field indicates that Aetna Slot-Wall panels will perform to your complete satisfaction.
