Why PolyBak?

Because it's the backer that will save you money *without* sacrificing performance.

- Polybak** is a Kraft linerboard balancing backer sheet priced to compete with similar products on the market, but with crucial differences (thanks to proprietary polymer technology) that provide **indefinite shelf life** and enhance the performance of the finished product.
- Polybak** is the only product of its type that has a **Class A flame spread rating** and contains **no added Formaldehyde**.
- Polybak** is highly **moisture resistant**, improving substrate balance and greatly reducing the potential for product warping.
- Polybak** is extremely flexible, lending itself to a greater variety of applications and eliminating waste through breakage.
