COMMITTED TO COUNTERTOPS

Aetna Plywood has always stocked an extensive inventory of countertop board for our customers. Why limit our customers to just a few sizes? We believe in giving our customers options! The right Size for the job!

DURAFLAKE® COUNTERTOP STOCK

The particleboard that offers the most versatility!!!

Manufactured predominantly with Douglas Fir, a material that promotes strength and stability, these non-structural, interior panels are engineered for applications such as, but not limited to: cabinets, shelving, fixtures and displays, furniture and door components.

3/4" 25 x 97	3/4" 25 x 121	3/4" 25 x 145
3/4" 26 x 97	3/4" 26 x 121	3/4" 26 x 145

AETNA Is Stocking Homasote 440 Sound Barrier®

YESTERDAY'S NEWS IS TODAY'S COMPETITIVE EDGE.

Homasote 440 Sound Barrier® is made of 100% post-consumer waste paper, without asbestos or urea formaldehyde. So it not only stamps out noise pollution, it is safe and environmentally sound.

BREAKTHROUGH BUT VIRTUALLY UNBREAKABLE.

Homasote 440 Sound Barrier® is the lightweight, structural sound deadening material that replaces lightweight concrete at a fraction of the cost. It works with almost any flooring system and has twice the R value of wood. Unlike concrete, it can be installed quickly and easily by the same crew laying the plywood sub-floor, for faster lower-cost job completion. It's so strong, lightweight, impact-resistant and easy to work with, it's hard to believe how effective it is.

Code	Size	Unit Size	Price/piece	Price/unit
17 14 200	1/2" 48 x 96	60	\$17.85	\$16.75

Thickness	Sizes	Weight lbs./sq. ft.
OTHER SIZES AVAILABLE AS SPECIAL ORDER		
1/2"	4 x 4, 4 x 8, 4 x 12, 4 x 10, 8 x 12, 5 x 8	1.2
5/8"	4 x 8, 4 x 12, 8 x 12	1.5

Sound Deadening

Deadens sound in residential or commercial buildings. Used in single or multi-family housing, professional buildings. Useful in room partitions.

Bulletin Boards

440 becomes the quick, inexpensive, tackable answer, exterior or interior for any home, office, workshop, factory, etc. Can be painted.

**Fabric Wrap
Wall Treatments**

Ideal substrate for custom textured fabric wrap panels. Provides sound deadening, insulation and tackability.

BEADED PANELS

The look of fine tongue and groove woodwork with the installation ease of a plywood sheet. That's the beauty of Columbia Forest Products' Beaded Panels. Check out the surface and you'll find the lasting beauty of Columbia hardwood veneers...and that's no illusion.

Good looks and installation ease are just the beginning. Columbia's Beaded Panels feature a wide variety of decorative hardwood faces and backs machined with a 1-1/2" or 3" on-center beaded groove pattern. The cutting heads are calibrated to ensure pattern uniformity across the entire sheet for a convincing illusion of tongue and groove woodwork that matches any existing species used. And since Beaded Panels are unfinished, close color matching with existing molding and millwork is possible. You can finish them or use them in painted applications.

Beaded Panels can be used for wall paneling, wainscoting, cabinet doors, cabinet backers or anywhere you wish to replicate the tongue and grooved appearance of fine woodwork.

All 1 sided items with a Balancing "Brown Paper Backer"

Unique Product: Ultra-Core MDO.

Plum Creek plywood is constructed from prime inland Group 1 western softwood veneers known for their tight grain and small knots. Furthermore, Plum Creek's Ultra-Core technology creates continuous, composed crossband veneers for virtually "gap-and-lap-free" cores.

Plum Creek's Ultra-Core MDO is the result of pre-composed crossband cores and an automated lay up process that together minimize core gaps and provide consistently high levels of core integrity. Merchantability, weatherability, durability and thickness tolerance are all enhanced compared to conventional MDO cores.

Plum Creek Ultra-Core MDO gives you what you're looking for:

- Inland western softwood species, featuring tighter grain for higher strength and weatherability.
- Ultra-Core construction means fewer and smaller gaps for increased strength, durability and minimal core telegraphing.
- 2-step overlay process means smoother, more consistent faces.
- Dedicated MDO press allows controlled production runs for greater quality and consistency.

Paint/Lamination/Cut-up Applications

- Ultra-Core construction reduces core voids and gaps to minimize waste in cut parts and increase weatherability and durability.
- 2-step face construction and dedicated press assure consistently high levels of face smoothness for paint and lamination.

Why PolyBak?

Because it's the backer that will save you money *without* sacrificing performance.

- Polybak** is a Kraft linerboard balancing backer sheet priced to compete with similar products on the market, but with crucial differences (thanks to proprietary polymer technology) that provide **indefinite shelf life** and enhance the performance of the finished product.
- Polybak** is the only product of its type that contains **no added Formaldehyde**.
- Polybak** is highly **moisture resistant**, improving substrate balance and greatly reducing the potential for product warping.
- Polybak** is extremely flexible, lending itself to a greater variety of applications and eliminating waste through breakage.
